

# We Secure IoT.™

Cog's breakthrough technology solves IoT security problems today. Our solution proactively delivers the most secure connected devices without impacting user productivity. World governments, defense departments and regulated enterprises rely on Cog to future proof the security of their connected devices.

## Security + Productivity

- Defense-grade embedded security that just works
- Allows end-users to work freely

## Reliability + Stability

- Modular architecture enhances flexibility
- Multiple levels of containerization, redundancy and granular control

## Extensibility + Scalability

- D4 Secure™ allows for highly modular design approach
- Ability to grow dynamically as requirements evolve

## Cost-effective + Manageable

- Commercial device at commercial price
- Unrivalled capacity management and control
